ADVANCED SECURITY + EDR
0-day, real-time malware protection
Anti-malware scans of backups, safe recovery
URL filtering, safe browsing
Exploit prevention
Security incident detection, remediation and response
Automatic attack interpretation
Single-click response incl. remediation and restoration
Managed Detection and Response
ADVANCED MANAGEMENT
Automated Patch Management
ML-based monitoring
Secure remote script execution
Next-gen remote desktop and assistance
Automated pre-patch backup
HDD health monitoring
Software inventory
Software deployment*
ADVANCED BACKUP
One-click mass recovery
Continuous data protection
Backup frequency for Microsoft 365 and Google Workspace
Off-host validation, replication and conversion to VMs
Support for more workload types
ADVANCED DISASTER RECOVERY
Production & test failover to Acronis Cloud
Orchestration with runbooks
AI-assisted Automated test failover
Multiple connectivity options: IPsec Multisite VPN, L2 site-to-site open VPN
Point-in-time recovery
ADVANCED FILES SYNC
eSignature with eIDAS certification
Notarization
ADVANCED AUTOMATION
Integrated ticketing
Automatic time tracking
Billing and invoicing
Contract and SLA management
KPI reporting
Integrated quoting
