<sup>1</sup> Requires Plus version

The AntiVirus products offered by AVG and Avast offer excellent endpoint protection. The questions below will help in identifying the optimal solution for end customers.

**Do you require an on-premise or cloud-based managed solution?**

Some organizations (banks, financial institutions, government agencies, medical etc.) require an on-premise managed solution for security or compliance purposes.

**Do you require Workstation support? and/or Server support?**

The Avast solutions offer support for both Workstations and Servers, the AVG solutions for Servers are expected to be updated in Q1 of 2017.

Additionally, the Avast for Business solutions support Mac. If you require Linux Server support, separate product versions are available.

**Do you require AntiSpam?**

AVG Internet Security Business Edition, Avast for Business Premium Endpoint Security, Avast Endpoint Protection PLUS and Avast Endpoint Protection Suite all include AntiSpam.

**Is secure deletion of files important to you?**

AVG AntiVirus Business Edition, Internet Security Business Edition and Avast for Business Premium Endpoint Security have the ability to securely and permanently delete data/files.

**Is secure file storage important to you?**

AVG AntiVirus Business Edition and Internet Security Business Edition both feature Data Safe which can encrypt and store files onto a password-protected virtual disk on the PC.
