

AVG Business Cloud Management Console

Manage your device and application security at no extra cost

AVG Business Cloud Management Console provides a simple solution for businesses to centrally manage the security of all devices in their network. Gain a comprehensive view of protection levels across the business with tools to run reports, receive notifications, add new licenses, and apply tasks – all free of charge with any AVG Business Endpoint Protection Solution.

Monitor device security

Use the console to monitor the health of all managed devices from one place, review the number of blocked threats, schedule regular scans, and more.

Install updates quickly

Remotely download and distribute virus and program updates to all devices from one console to save time and bandwidth.

Set up in minutes

Choose an endpoint protection solution, set up the console, and assign your antivirus and patch management to your devices to protect them from cyberthreats.

Centralize management

Stay in complete control of patches with centralized management that allows you to scan all devices, set schedules, and receive reports from a single console.

Set up your console in 3 easy steps

Select your Endpoint Protection Solution

Select on-premise or cloud Management Console

Install, activate, and protect your devices

Features

Management Dashboard

Activate devices, add devices to groups, configure antivirus settings, and view blocked threats from an easy-to-read dashboard.

Notifications

Receive instant email notifications on any security threats or network issues that need your attention, including outdated antivirus applications, extended device inactivity, and additional device updates.

Master Agent

Select a device as the Local Update Server where all updates can be downloaded. Save bandwidth by scheduling and distributing updates to all endpoints in your network when it's convenient.

Tasks

Set up security tasks for all managed endpoints, such as scans, messages, updates, and shutdowns to ensure optimal security for the entire network.

Device Setting Templates

Equip your managed devices with default security templates that are easily customizable to ensure each device has the appropriate amount of protection.

Reports

View detailed reports that include blocked threats, task lists, and protected devices, making it simple to improve security and customize protection.

System Requirements

Windows

Windows 7 (Service Pack 1), Windows 8, Windows 8.1, Windows 10 – Windows 10 Pro, Windows 10 Education, and Windows 10 Enterprise.

Windows XP (64-bit version with SP3)

Windows Vista (SP2)

Servers

Windows Server 2019 (64-bit version)

Windows Server 2016 (64-bit version)

Windows Server 2012 (64-bit version)

Windows Server 2008 R2 (64-bit version with the latest Service Pack, excl. Server Core Edition)

Microsoft Exchange Server 2016 (64-bit version)

Microsoft Exchange Server 2013 (64-bit version)

Microsoft Exchange Server 2010 Service Pack 2 (64-bit version)

Mac

MacOS 10.9 (Mavericks or later with at least 500 MB of free disk space.)

Hardware

Intel Pentium 4 / AMD Athlon 64 CPU supporting SSE2 instructions, 256 MB+ RAM and 2 GB of hard disk space.

Services

Patch Management

Stay ahead of vulnerabilities by identifying critical patches and easily deploying them across all endpoints from one dashboard.

AVG Antivirus Business Edition

Protects your endpoints from ransomware, malware, and other advanced cyberthreats.

AVG Internet Security Business Edition

Protects your endpoints, emails and networks from ransomware, spam, phishing, and other threats.

AVG File Server Business Edition

Protection for Windows servers to safeguard files and company data.
