

BullGuard®

PREMIUM PROTECTION

Smart security
for you, your family
and your home

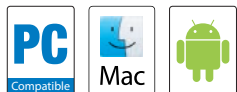

WITH ENHANCED PROTECTION, GREATER SPEED, AND MORE CONTROL — 2019 IS OUR BEST EDITION YET!

Our latest Premium Protection delivers improved performance and advanced, multi-layered protection which takes care of you, your family and your smart home, like no other online security suite.

- ✓ **Improved** performance with minimal impact on system resources
- ✓ **Optimised** CPU performance for quad-core PC gamers
- ✓ **Revamped** vulnerability scanner identifies potential gaps in your security

In addition to award-winning malware protection, our advanced technology safeguards your identity on the Web and unique features like our smart home network scanner stands guard over all your connected devices to ensure they don't become an open door for hackers to reach your personal and financial data.

Keeps you safe from all online threats

- 24/7 monitoring of your home's smart devices gives your home network a first line of defence against cybercrime.
- Safeguards your identity by continually monitoring the web
- Multi-layered protection keeps you safe from hackers, ransomware, viruses and spyware.
- Robust Firewall protects against intruders and network attacks.
- Revamped Vulnerability Scanner spots missing security updates, and connections to unsecured Wi-Fi networks.
- Enhanced Behavioural Detection now receives continuous daily updates, improving accuracy and its ability to detect and block the very latest threats.
- New Network Safety Check warns you about insecure networks with no password protection or inadequate encryption.

Safeguards your private data

- Encrypted Cloud Backup to your Dropbox, Google Drive or OneDrive accounts.
- Safeguards your most precious memories, photos, videos, data and files and keeps passwords protected and private.

Helps keep your children safe online

- Discreet Parental Control ensures children stay safe online.
- Blocks access to suspicious websites and applications and ensures children don't access inappropriate content.
- Restricts Internet time and helps you check your kids' online habits.
- Patent-pending Game Booster technology maintains complete protection during game-play without disturbance or annoying pop-ups. Best of all, it enables PCs to run games faster than if no AV product was installed. Gamers often turn off internet security because it slows gaming down. Now they no longer have to choose between safety and lightning-fast gaming. With BullGuard, they can have both.

We keep you safe and we keep it simple

- The best protection you can get, with minimal use of system resources.
- Simple to set up, monitor and tailor online protection.
- One License protects up to 10 PCs, Macs and Android smartphones & tablets.
- 24/7 expert and friendly online support, with simple one-click access and sharing of application logs.
- PC Tune Up for top computer performance.

Protecting your Home Network

Smart homes have multiple connections to the Internet – through smart TVs, security cameras, heating systems, baby monitors even smart kettles. All these devices are notoriously vulnerable to hacking and, left unguarded, they're an open door for cyber attacks and the theft of your personal data and files.

That's why we've incorporated our Home Network Scanner into BullGuard Premium Protection. It continuously monitors your home Wi-Fi network, identifies all connected devices and stands guard over them alerting you to any potential privacy and security breaches.

You, your family and your home are continually at risk from the threat of cybercrime. BullGuard Premium Protection is the best you can get.

BullGuard is the only Internet Security provider focusing exclusively on the home user. Our security software is easy to install, light on system resources and consistently wins independent testing for malware catch rates and the industry's 'best buy' awards.

As well as winning the latest **Gold Malware Protection Award** from AV-Comparatives, BullGuard also won the **UK PCR 2018 Award** for Vendor – Software, Service and Support, the **2018 Stevie International Business Award** for the most innovative, consumer friendly software and ranked **100% Protection** in tests carried out by independent laboratories AV Comparatives and AV-Test. Constant innovation is central to everything we do ensuring our customers have the best multi-layered protection possible against ever-evolving viruses, malware, ransomware, and all online threats.

It's why millions of people like you trust BullGuard to simply keep them safe online.
