# Activate Now to Stay Safe Online

Get all the protection of BullGuard's award-winning Internet Security now!

**1**

To set up your account simply visit:  
[www.bullguard.com/is-install](http://www.bullguard.com/is-install)

**2**

Click on the download button and follow the screen prompts to install BullGuard.

**3**

Register your account using a valid email address and choose a password. No other personal information is required.

**4**

Enter your license number:

**PLACE LICENSE KEY HERE**

*As soon as the license key has been used, your subscription to BullGuard is tied to the email address you have registered and not to the license key. The license key can only be used once. However, make sure you do not discard it after use as we may need it to verify account ownership.*

**5**

Restart your computer to complete the BullGuard installation.

**Need help?**

Chat live with our support team 24/7 at  
**[www.bullguard.com/support](http://www.bullguard.com/support)**  
or email us at **[support@bullguard.com](mailto:support@bullguard.com)**

## After installation

### Installing BullGuard on additional computers

To install BullGuard Internet Security on other PCs click the **'Log in to BullGuard'** button in the registration dialogue and log in from your existing account. Your BullGuard subscription covers up to 3 separate PCs in the same household.

### Re-installing BullGuard

Should you need to re-install BullGuard on equipment that has previously had BullGuard installed, simply log in with your username and password when prompted.

#### **Warning!**

To avoid abuse of your subscription rights, do not share your account details with other people. Abuse of your account is detectable and will result in the cancellation of your BullGuard subscription.

#### **Important!**

BullGuard detects well-known security software that may be installed on your computer. We suggest that you remove it before you install BullGuard. You can do this through the Control Panel on your computer. If you don't remove the existing software, you may find you have difficulty implementing BullGuard or your computer runs very slowly as a result of software conflicts.
