

It may look like a baby monitor but it's a hacker's way into your home

BullGuard Premium Protection – with Home Network Scanner

Your home's smart devices – TVs, central heating system, security cameras, even your smart baby monitor – need as much online protection as your computers, tablets and smartphones. That's why the latest Premium Protection continuously monitors your home wifi network, standing guard over all your connected devices to ensure they don't become an open door to cyber attack.

PREMIUM PROTECTION

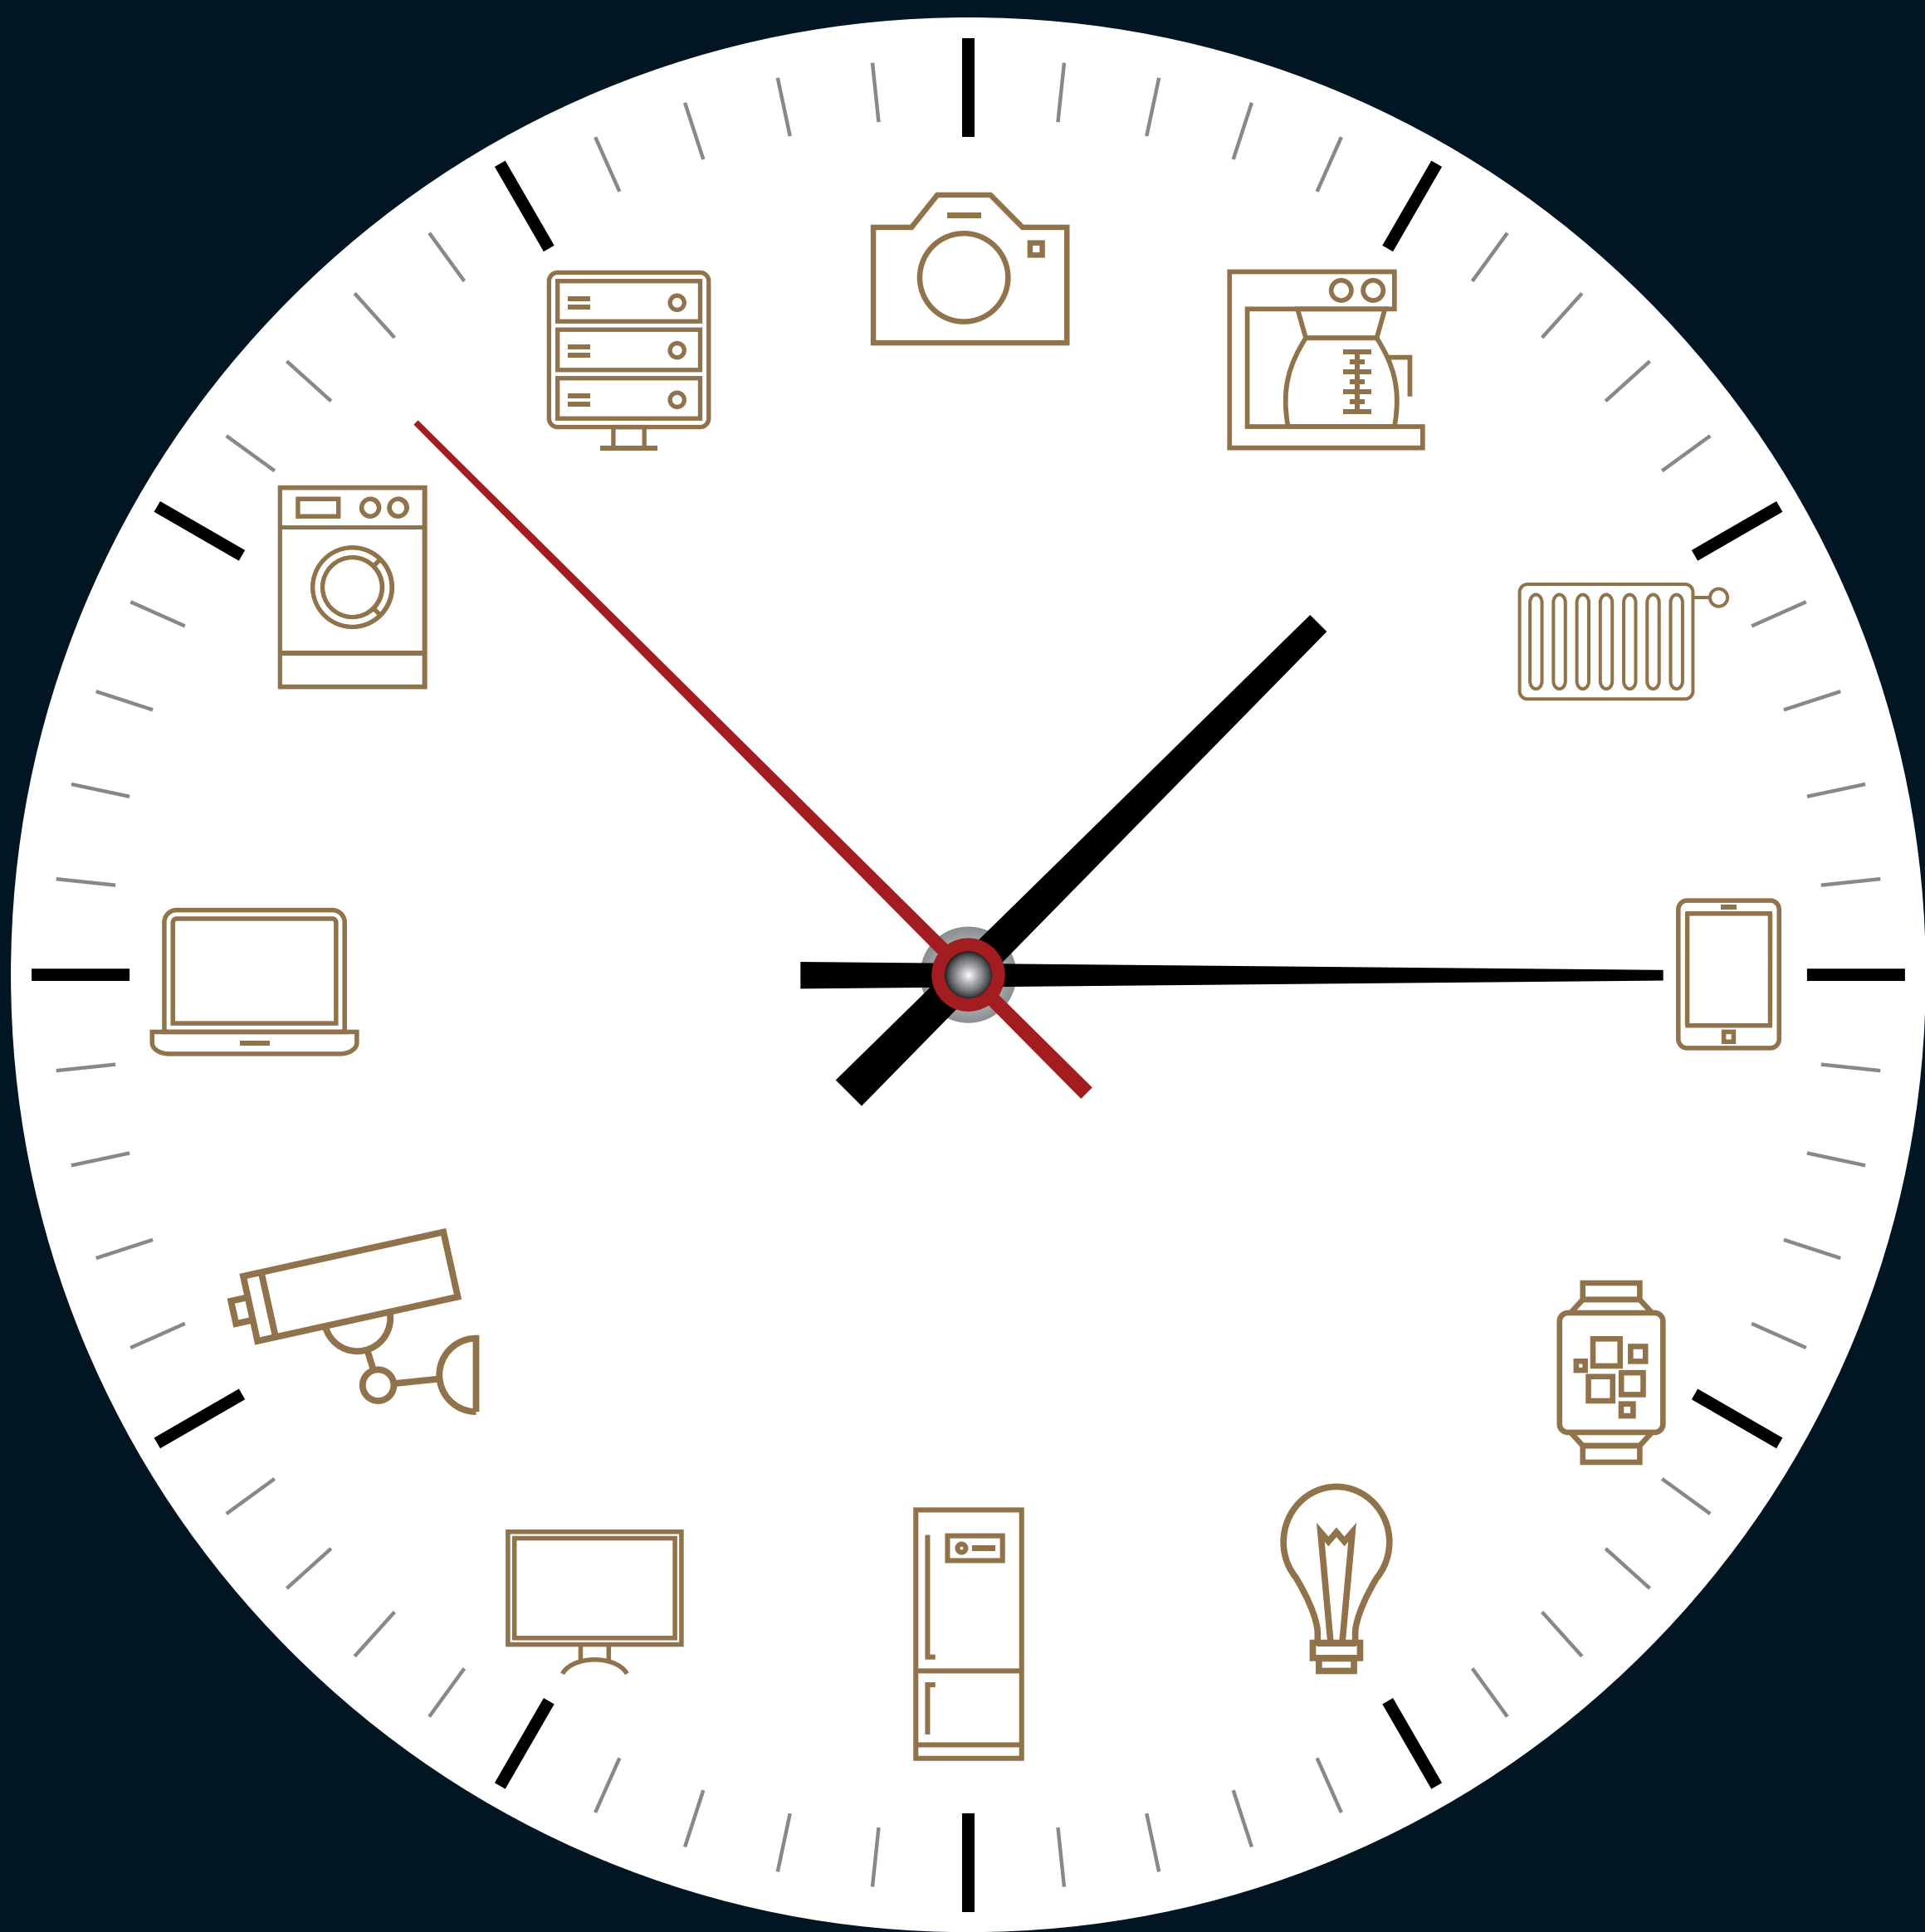

BullGuard®

No one does more to keep you safe online

Around the clock protection for every connected device in your home

BullGuard Premium Protection – with Home Network Scanner

Smart devices are great, but they're extremely vulnerable to cyber attack, giving hackers easy access to your personal and financial information.

BullGuard's unique, Home Network Scanner in our latest Premium Protection, continuously monitors your home Wifi network to ensure they don't compromise your online security.
