

Sangfor HCI Compatibility List

2018Q2

Server Hardware Compatibility List	
Vendor	Model
Note 1: HCI software supports Intel E3/E5/E7/SP CPU Series, for AMD, only Opteron 6xxx series is supported	Note 2: The key evaluation metrics for server hardware compatibility focus on the compatibility of RAID cards, NIC cards and disks.

Disk Compatibility List						
Type	Vendor	Model	Capacity	Size	Interface	Note
Note 1: SSD must be DC-class, choose the SSD models on the list in priority, other DC-class SSD models will need to be evaluated by Sangfor.	Note 2: 4Kn disk format is not supported, 512n is recommended, then 512e.	Note 3: When disks are configured in hybrid mode which means using SSD as cache disk and HDD as data disk, the total raw capacity of SSDs on each node must be more than 5% of the total raw capacity of HDDs on the node . The more SSDs there are, the higher the performance will be.
