

## **YSoft SafeQ 5 - Release notes**

January 15, 2020

## 1 MAINTENANCE UPDATE 76 (01/17/2020)

**Warning:**

Due to a Java platform change, a direct update from YSoft SafeQ 5 MU48 and lower, to YSoft SafeQ 5 MU70 and higher, is NOT supported. Installations with YSoft SafeQ 5 MU48 and lower should be updated to YSoft SafeQ 5 MU69 first. Then an update to MU76 can proceed.

**Fixed:**

- A new version of YSoft SafeQ Client, version 2.29, is included in the YSoft SafeQ installation package. YSoft SafeQ Client's communication with the YSoft SafeQ 5 server, which was updated from YSoft SafeQ 5 MU74 or lower, is no longer affected when a special configuration is used. The encryption is not enabled and the user identification, "Login dialog" or "Login dialog – username only", is selected.
- Repeated installation of Embedded Terminal for Xerox AltaLink now passes the step for Convenience Authentication without a warning.
- A print job owner, who has authenticated to YSoft SafeQ Client when printing to a direct queue, is now preferred to a username extracted from a XCPT header created by a Xerox native print driver.
