

| ID      | Summary   | Priority    |
|---------|---|-------------|
| LOC-177 | "API user ..." instead of "A Api user ..."                                      | Minor (C)   |
| LOC-244 | Dutch terminology on SKMET is not correct                                       | Major (B)   |
| LOC-246 | change of YPS texts related to external payment system provider                 | Major (B)   |
| MSG-41  | Security scan can break the connection between TS and ORS/CML                   | Major (B)   |
| PAC-139 | Dashboard - ServiceDesk data are out of date                                    | Critical    |
| PAC-166 | IntervalShort may be ignored  | Minor (C)   |
| PAC-187 | Relative path to results folder does not work                                   | Minor (C)   |
| PAC-205 | Weak reference in logging initiation  | Minor (C)   |
| PAC-206 | Logs - unnecessary newline in dump of current configuration                     | Minor (C)   |
| PAC-209 | Log - sqhc-csdm-info-xxxxxxx.result doesn't exist                               | Minor (C)   |
| PAC-22  | Export does not export complete data  | Blocker (A) |
| PAC-226 | Good to place space between MA and later text in email subject                  | Trivial     |
| PAC-229 | LogParser - not rotating logs are re-analyzed with every timestamp change       | Major (B)   |
| PAC-244 | Add MA number to alert message  | Minor (C)   |
| PAC-245 | CPU and memory is not checked on CML with SafeQ4                                | Major (B)   |
| PAC-246 | Alerts - clearly mark what is past and what is stil not working                 | Minor (C)   |
| PAC-259 | Failed PP authentication shows detailed error message                           | Minor (C)   |
| PAC-261 | Logging - LongTasks End of loop is logged frequently                            | Trivial     |
| PAC-328 | Continuous "End of loop" messages from LongTasks                                | Minor (C)   |
| PAC-343 | Installer: Log file will be created in the same location where installer exists | Major (B)   |
| PAC-350 | CSDM Monitor - no pg_hba.conf entry for host                                    | Major (B)   |
| PAC-366 | Adjust timestamp in the alert notification                                      | Trivial     |
| PAC-372 | AlertRecipients cannot contain more than one recipient                          | Minor (C)   |
| PAC-382 | validateMonitorSections() requires LogFolders                                   | Blocker (A) |
| PAC-416 | After 30 days Result files rotate with every new line                           | Critical    |
| PAC-417 | result files do not rotate (old files are not purged)                           | Minor (C)   |
| PAC-428 | Incorrect entries in Licenses.txt   | Trivial     |
| PAC-429 | Error is sometimes recorded in Windows Application Event Log during start-up    | Major (B)   |

|           |  |             |
|-----------|--|-------------|
| PAC-432   | SafeQ 4 auto configuration: KeyError   | Minor (C)   |
| PAC-466   | When ORS is unavailable: UnboundLocalError: local variable 'section' referenced before assignment                                | Major (B)   |
| PAC-467   | MiddleTask fails on "The RPC server is unavailable"  | Major (B)   |
| PAC-468   | Finding log folders which contain files ending with '.log' takes too long  | Blocker (A) |
| PAC-480   | Remove "health-check-" from Agent Version  | Minor (C)   |
| PAC-493   | Remove logging message Analyzing sessions .. Sessions on ..  | Minor (C)   |
| PAC-494   | MssqlPlugin - Unable to load configuration   | Critical    |
| PAC-496   | Disable ALERT-DISK until PAC-398 is resolved   | Minor (C)   |
| PAC-510   | Build of installer fails on master branch  | Major (B)   |
| PAC-517   | "Open configuration file" asks application to open   | Minor (C)   |
| PAC-519   | Uninstallation runs twice  | Major (B)   |
| PS-1408   | ordering subjects by column "name" is not working  | Minor (C)   |
| PS-1811   | payex displays authorization form for already authorized user  | Minor (C)   |
| PS-1812   | jade error in YPS administration on detail of subject in case of unauthorized payex user   | Critical    |
| PS-1819   | settlement of one step transactions fails on payex communication error   | Major (B)   |
| PS-1821   | automatic creation of user in YPS with SQ6 will not fill payment_provider_account_id   | Critical    |
| PS-1831   | SQL error during scheduled delete of payex reservations  | Minor (C)   |
| RICOH-607 | It is not possible install Ricoh ET on ORS   | Blocker (A) |
| SCI-425   | It is not possible to update CML from previous version because installer is searching for incorrect terminal server service name | Blocker (A) |
| SCI-426   | Install the Terminal Server button is unchecked when updating from MU33 to MU33  | Major (B)   |
| SQ-3216   | ORS cache - last modified date of a user's record is not updated when the user is authenticated on a MFP                         | Minor (C)   |
| SQ-3221   | Optimize loading user groups for sync to ORS   | Minor (C)   |
| SQ-3226   | Creation of money account fails for LDAP accounts with diacritics in the name  | Major (B)   |
| SQ-3231   | Device Exchange does not exchange device properly so jobs are still reported to the original device                              | Minor (C)   |
| SQ-3277   | Web report - export to file returns zero size file   | Major (B)   |
| SQ-3324   | Installation on KMET never finish successfully   | Critical    |
| SQ-3325   | Device state MUNI: When IPP is disabled on MFD, NPE is thrown when checking device state before print                            | Critical    |
| SQ-3329   | Security scan can break the connection between TS and ORS/CML  | Major (B)   |

|          |   |             |
|----------|---|-------------|
| SWA-2046 | allow-unlock property is not displayed on web interface   | Minor (C)   |
| SWA-2053 | Web link from YSoft SafeQ dashboard are being displayed without scrollbars  | Minor (C)   |
| SWA-2066 | Bad validation of dates in filtering web reports  | Minor (C)   |
| SWA-2096 | KM ET: Kiosk mode is not enabled after installation   | Minor (C)   |
| SWA-2128 | My links dashboard widget does not work correctly   | Critical    |
| SWA-2129 | Unable to add ET, if HWT license count is reached   | Critical    |
| TS-1803  | When paper runs out or user has insufficient credit during copying, job is not accounted and reservation not cancelled    | Critical    |
| TS-2266  | It takes 2 deployments to deploy embedded with correct setting of folders (jobs all in one folder, waiting, printer etc.) | Minor (C)   |
| TS-2273  | Samsung ET: Billing code menu appears in scan parameters menu   | Minor (C)   |
| TS-2278  | Performance optimization - duplicated requests by terminal server   | Minor (C)   |
| TS-2320  | Toshiba TE: Invalid ID of job to be loaded (must be greater than zero): 0   | Trivial     |
| TS-2347  | DOC: Samung ET - YSoft SafeQ icon on home screen  | Minor (C)   |
| TS-2473  | DOC: Recovery scenarios do not work on environment with ETCD  | Minor (C)   |
| TS-2526  | WPS requests are logged as payment requests   | Minor (C)   |
| TS-2540  | Sharp ET: If HTTP request contains unknown X-BC-Resolution header terminal crashes  | Major (B)   |
| TS-2541  | Communicator - Handle possible failure in client socket creation properly   | Major (B)   |
| TS-2551  | Scans in Sharp application are displayed without CSS  | Blocker (A) |
