YSoft SafeQ 5 - Release notes

November 20, 2018

TABLE OF CONTENTS

1 MORE HIGH-LEVEL DETAILS ABOUT YSOFT SAFEQ 5 FEATURES FOLLOW:

☑ **YSoft Payment System** - Allow users to pay for print, copy or scan services in your environment. Users are charged based on prices defined in YSoft SafeQ, using pre-charged money on their accounts. Users are able to recharge their account using YSoft Payment Machine (recharging station) and manually-operated Cash Desk. Integration with third-party systems is possible thanks to robust set of APIs. Support for PayPal and Dibs included in the form of standalone plugins.

☑ **Mobile Print Server** - Allow your end users to print from devices on the go. No need to teach your users anything complex or install drivers; the solution is as simple as sending an e-mail or uploading a document via designated web page. No need to install third-party software like Microsoft Office or Libre Office to perform document conversion.

☑ YSoft SafeQ Embedded Terminal - New browser-based terminal with updated graphical and interaction design lowers the amount of time your users need to spend with multifunction devices.

☑ **Management Reports** - Obtain visually beautiful and structured report with one click. Report provides a complete picture of the print environment, including information about paper consumption, printer utilization, prints per user for specified period.

☑ **Private Cloud Technology** - Large deployments are generally supported using distributed architecture model (central management and local spoolers). YSoft SafeQ 5 brings an improved **High-Performance Offline Remote Spoolers**, which are able to handle up to 200 connected devices. With server-level Print roaming, users can pick up their jobs in the entire print environment.

☑ **Rule-based engine** - Apply rules over print jobs. Force monochrome instead of color, double-sided instead of single-side print. Apply more rules based on different events and options. Simple wizard is available even for unexperienced administrators.

☑ **Collaboration** - Multiple users working on a same project, admin picking up jobs for the manager. Shared queues and Delegation print features allows sharing print jobs among working groups or delegate the print release to another team members.

☑ **Assignable price lists** - Create one price list or custom price list for every user, device or cost center. Make sure that each person, cost center or device is billed according to your internal guidelines and policies.

☑ Multi-level Billing Codes - Monitor costs for different customers, projects or even departments using multi-level billing codes (also known as project codes). Users can change the billing code using external or embedded terminal, or at the workstation.

☑ **Reporting** - Automatic or manual reports available in web administration, including Green reports and **Central Reporting Services** support. Check spent and saved money and allow your users to see their statistics.

☑ **Administration and User web interface** - Easy-to-use web interface, which includes Admin Dashboard and User Dashboard. Admin dashboard provides tools for managing users, devices, print queues, scan workflows and other parts of the system.

☑ **Integrated installation** - Basic server installation and deployment wizard. Advanced or large deployments can be satisfied with set of standalone packages for different parts of YSoft SafeQ.

☑ **Licensing System** - The all new per-device, flexible licensing model. Product can be quickly activated online or offline using new, user-friendly steps. New license information is automatically distributed within the entire system.

2   MAINTENANCE UPDATE 62 (11/23/2018)

- Embedded Terminal for Xerox has been improved. Color restrictions on copying can now be defined by adjusting YSoft SafeQ user roles.
- PowerPoint presentations with different formats are now correctly transformed and printed on A4 paper when the "correctSlideSize" property is true in the Mobile print server's configuration file.
- A new version of firmware for Terminal Professional 3.5 (3.15.16) has been created. Improvements are:
    - User credentials are no longer written in the log file.
    - The logo visible on the touch screen can be customized via the remote configuration tool for hardware terminals (Termtool).
- User access to Xerox VersaLink native copy and fax functions can now be restricted based on a user role.
- The print progress window is once again shown on the Embedded Terminal 2nd Gen. for Xerox VersaLink.
- The Embedded Terminal installation guide for Toshiba / OKI devices, based on e-BRIDGE NEXT or later architecture, has been extended. An IP-specific certificate is necessary for secure communication.
- Connectivity of Embedded Terminals to Terminal Server in a clustered environment with load balancing has been improved. The first start of Embedded Terminal is now quicker. This applies to Embedded Terminal for Xerox, Fuji Xerox, Toshiba, OKI, Sharp and Ricoh devices.
- When a terminal installation fails because the device is locked by a user or administrator, a better message is now written in the log file: "Could not log in to the device because it is in use."
