YSoft SafeQ 5 - Release notes

October 17, 2019

1   MAINTENANCE UPDATE 73 (10/18/2019)

Warning: Due to a Java platform change, a direct update from YSoft SafeQ 5 MU48 and lower, to YSoft SafeQ 5 MU70 and higher, is NOT supported. Installations with YSoft SafeQ 5 MU48 and lower should be updated to YSoft SafeQ 5 MU69 first. Then an update to MU73 can proceed.

- Automated Scan Workflows are once again functional with Embedded Terminal for Ricoh on Ricoh IM 430F/350F devices.
- Embedded Terminal for Ricoh has been adapted for special conditions to prevent a random freeze of the terminal on older devices.
- The portrait/landscape orientation of scanned documents has been fixed for Ricoh IM 430 devices.
- The YSoft SafeQ installation package now includes a newer version of the third party component: Apache Tomcat version 7.0.94, to remove vulnerabilities of the previous version.
- Embedded Terminal for Ricoh now closes all sessions even when the device doesn`t send an ending message after a proceeding scan. A new system property, "ricohHotFolderScanConfirmationAfterLogoutTimeout", has been created to solve the non-standard situations.
- The XML parser used for importing scan workflows from an XML file has been configured to prevent XML External Entity attacks.
