

# **YSoft SafeQ 5 - Release notes**

May 25, 2020

## 1 MAINTENANCE UPDATE 81 (05/29/2020)

### Warning:

Due to a Java platform change, a direct update from YSoft SafeQ 5 MU48 and lower, to YSoft SafeQ 5 MU70 and higher, is NOT supported. Installations with YSoft SafeQ 5 MU48 and lower should be updated to YSoft SafeQ 5 MU69 first. Then update to MU78 can proceed.

Due to Tomcat configuration improvement, it is recommended to manually update the *server.xml* when updating from YSoft SafeQ 5 MU79 and lower. Update Tomcat's *server.xml* as described in the article "Configuring SSL/TLS for Web interface".

### What's new

A list of supported operating systems has been extended. YSoft SafeQ 5 can now be installed on Microsoft Windows Server 2019. The full list of supported operating systems is in the "Software requirements" section in the YSoft SafeQ 5 documentation.

### Fixed:

- All terminals will not allow free of charge operations if a payment system is used and the payment system did not fully start. (SBT-1107)
- Job list shows results for searches by cost center if a specific time interval was applied. (SBT-1176)
- Security of CML web interface was improved against Stored Cross-site Scripting (XSS) on Dashboard, Support Information Page and other areas. (SBT-189)
