YSOFT SAFEQ 6

Build 59 Release Notes

CONTENT

1 LIMITED DEVICE LIST

Limited Device List Extended

The list of devices supported under the SAFEQ Print Management Suite LD has been extended. All the supported devices can be found on the [Hardware Compatibility List (HCL)](#)

Newly added devices under this license model are: (SQC-5829)

Ricoh MP301SPF

Ricoh IM350F

2 FIXES AND IMPROVEMENTS

2.1 TERMINALS, USER INTERFACES

When price estimation is used, the estimated price is accurately reflected (Rounding up/Down).

(SBT-2815)

The configurable time out value in the 'Scan Parameters' has been increased to allow for successful delivery of the users scan job when remaining on one screen for a long time with no refresh. (SBT-2803)

Font size limitation is clearly communicated when utilizing the rules-based engine 'Watermark'. (SBT-2802)

After log-in at the MFD, the user can successfully search for the billing code with no unexpected error occurring. (SBT-2771)

When printing PDF jobs where there is a missing GhostScript Parser, a warning message will be displayed in the job information page within management (SBT-2765)

When the Konica Minolta finishing options have been enabled, the user is able to select the job detail and successfully release the job. (SBT-2759)

Job title fits the text frame in job detail on YSoft SAFEQ end user interface. (SBT-2715)

In management interface, the user access rights description is accurately displayed. (SBT-2540)

2.2 INSTALLATION AND ADMINISTRATION

In management interface when selecting any language, the language selected will be displayed accurately in management dashboard. (SBT-2819)

In management interface when selecting 'Chinese' language, the translation of 'Application Feature' is accurately reflected. (SBT-2818)

Mobile integration gateway services start automatically upon a restart of the server. (SBT-2817)

When updating the Server Installer in simplified Chinese language, the previous version number is accurately displayed. (SBT-2813)

Communication between terminal server and FujiXerox MFD has been hardened. (SBT-2804)

Blank page removal is now disabled by default when OpenAPI 4.13a is set in management interface and the MFD supports setting of this property. (SBT-2788)

An uninstall of a Sharp device is successful even if the terminal server is no longer installed. (SBT-2781)

A user's favorite jobs when re-printed will be accurately reflected in web reports. (SBT-2769)

During the pre-installation checks, the installer will show a user warning about the print spooler service not running but installation will continue. (SBT-2767)

Data is preserved in the case of a validation error of an installed cloud terminal. (SBT-2760)

In management interface, the description of the title page is correctly reflected when uninstalling a device. (SBT-2756)

In management interface, all CACP configuration properties are part of a cluster management configuration. (SBT-2750)

In management interface, it is not possible to hide (fold) a billing code if no billing code has previously been saved allowing for a clear user experience. (SBT-2714)

Printing on Brother devices via IPP is now working. (SBT-2686)

A copy of the scan is sent to the logged-in user when using "send me a copy" in Lexmark native scanning solution. (SBT-2288)

In management interface, only appropriate controller advice will run when required. (SBT-2247)

2.3   EARLY ACCESS PROGRAM

In SAFEQ Client V3, the user will be prompted to authenticate again if the incoming job fails. (SBT-2810)

Within SAFEQ Client V3, if a user's job fails it will be accurately logged making troubleshooting easier.

(SBT-2806)

When creating a new scan workflow with Micro Focus Content Manager (formerly HP Content Manager, HP Trim) it is correctly saved. (SBT-2791)

The user will be displayed an error message in the SAFEQ Client V3 when the SPOC is down. (SBT-2757)

In SAFEQ Client V3, if a connection to the site server is lost, a user error message explains what went wrong. (SBT-2755)

> YSoft SAFEQ Client v3 is under the Early Access Program (YSQL6-049-0000; YSoft SAFEQ Client v3; F_NEW_SQ6_CLIENT); see details about the program in Early Access Program. Client application use needs to be validated by a Y Soft Solution Consultant.

2.4   OTHER INCLUDED CHANGE CODES

SQC-5910, SQC-5909, SQC-5812, SQC-5789, SQC-5764, SQC-5645, SQC-5638, SQC-3797, SBT-2846, SBT-2835, SBT-2554, SBT-2479, SBT-2287

2.5   PRODUCT EXTENSIONS (OR CUSTOMIZATIONS)

Customers who use YSoft SafeQ extensions or customizations should contact their Y Soft RSM or Customer Support Services for compatibility verification with the new build. We recommend testing all extensions before applying a Build update into a production environment.

You can find additional information on Partner Portal:
