YSOFT SAFEQ 6

Build 61 Release Notes

CONTENT

1 FIXES AND IMPROVEMENTS

1.1 TERMINALS, USER INTERFACES

When an administrator logs into the Management interface and opens the price list/billing page, the menu of 'Detail Scan' is selectable. (SBT-3039)

No blank options are listed in 'Job has status' under the add/edit rules screen within the Management interface. (SBT-3061)

When a user creates a Scan Workflow on the 'User Input' screen, a clear error message is displayed if incorrect values are added to the 'Number Field'. (SBT-2947)

The Ricoh SOP terminal now redirects the user to the correct initial screen. (SBT-1788)

1.2 INSTALLATION AND ADMINISTRATION

In the Web reports screen, when an administrator selects the 'Include latest processed data' button, the web page is displayed normally. (SBT-3030)

When a user selects 'Add Connector' in Scan Workflows, they are informed of the need to choose a 'Connector Name' to complete the task. (SBT-2969)

Installers have been modified so that the YSoft Payment System and the End User Interface run under 'Local Service'. (SBT-2949)

Scanning to the home directory of the user is possible only when the user has their home directory defined. (SBT-2942)

In the Scan Workflow 'Extension Connector', the delivery filename is used. (SBT-2929)

When NTLM is disabled on the Mobile Print Server but enabled on the mail server, it no longer leads to the Mobile Print Server notification sending failures. (SBT-2923)

The administrator can now see the progress of an embedded terminal installation for all devices.

(SBT-2924)

Custom filters are correctly stored when creating a custom web report. (SBT-2884)

Within Scan Workflows, all passwords are removed from the management audit log message when creating or updating scan connectors. (SBT-2876)

Upon a failure of the Terminal Server, a greater level of detail is provided in the log files. (SBT-2862)

A custom configurable session timeout has been implemented for Konica Minolta 'Merging originals' within Scan Workflow. (SBT-2834)

The description of the header name is correctly reflected when in 'Uninstall Device' in the Management interface. (SBT-2756)

Once removed, 3D-related attributes will not be shown in custom web reports. (SBT-2700)

In the Management interface, 'Edit User Page', the correct error message is displayed when the user does not enter a name. (SBT-2514)

Selected text within the Management interface reflects the correct translation. (SBT-2014)

1.3   EARLY ACCESS PROGRAM

SAFEQ and Dispatcher Paragon logos are added to the header of the SafeQ Client V3. (SQC-5999)

The SAFEQ Client V3 user interface is automatically launched for signed-in users after installation of the spooler via PS script. (SBT-2502)

YSoft SAFEQ Client v3 is under the Early Access Program (YSQL6-049-0000; YSoft SAFEQ Client v3; F_NEW_SQ6_CLIENT); see details about the program in Early Access Program. Client application use needs to be validated by a Y Soft Solution Consultant.

1.4   OTHER INCLUDED CHANGE CODES

SQC-6053, SQC-6052, SQC-6011, SQC-6007, SQC-6001, SQC-5977, SQC-5967, SQC-5797, SQC-5790, SQC-5744, SQC-5743, SQC-5527, SBT-3023, SBT-3021, SBT-3013, SBT-3002, SBT-2993, SBT-2991, SBT-2982, SBT-2967, SBT-2950, SBT-2935, SBT-2917, SBT-2914, SBT-2911, SBT-2907, SBT-2892, SBT-2421, SBT-2173

1.5   PRODUCT EXTENSIONS (OR CUSTOMIZATIONS)

Customers who use YSoft SafeQ extensions or customizations should contact their Y Soft RSM or Customer Support Services for compatibility verification with the new build. We recommend testing all extensions before applying a Build update into a production environment.

You can find additional information on Partner Portal:
